

Energy

Program Description

This year-long, two-hour, career-oriented program is designed for students to learn and apply theoretical and technical knowledge of energy and electrical systems. It has been developed with industry to ensure students gain the necessary skills to earn initial industry certification, leading to a career in the energy industry as an electrical overhead line worker. The program provides a great opportunity for students to combine science with applied technology. Students will explore career opportunities, earn their OSHA 10 certification card, gain industry connections, take a free certificate test for Energy Industry Fundamental (EIF) credential, and so much more!

**Not Available for the 2023-2024
School Year**
