

# Finance

## Program Description

Our finance/accounting program offers a comprehensive education in personal finance, investment strategies, and accounting principles. Students gain the practical skills needed to make informed financial decisions, explore careers in finance/accounting, and understand the dynamics of the financial industry.

Students will understand personal and corporate financial activities, develop a strong foundation in money management, gain knowledge in accounting principles, financial analysis, and wealth creation strategies. Through projects and simulations, students will make real-world connections and develop decision-making skills. Participation in DECA is also available to apply the preparation gained through these courses.

| <i>Instructor</i>               | <i>Course(s) Name</i>              | <i>Instructor Contact Information</i>   | <i>Program Links &amp; Information</i> |
