

Firefighter

Program Description

Howell Public Schools operates an educational program for high school juniors and seniors in preparation for the state certification exam for firefighters. Howell Public Schools partners with Brighton Area Fire Authority (BAF) for instruction and operation of the program at BAF station 34. This rigorous and robust program allows a student to gain experience and demonstrate proficiency in basic firefighting and rescue techniques and it provides the credentials necessary to become employed with local fire departments. The state requires that students attend at least 90 percent of the classroom time and 100 percent of the practical skills time presented in this course. In addition to normal meeting times, one additional Saturday per month is required, allowing the students more time to get into scenario-based practical skills training.

Admission to the program is very competitive. You can learn more about the process and acquire the application [here](#).
