

Welding

Program Description

Students have an opportunity to learn about the welding field, gain safety training, and engage in a variety of welding processes that will prepare them to work in the welding industry. Activities are available to learn about MIG and TIG welding machines, working with basic hand tools, oxygen acetylene processes, metal prep, blacksmithing, equipment setup, and more.

As students advance, they are exposed to metal arc welding equipment, plasma arc cutting, knowledge of shielded gases and recognizing the quality and strength of common welds.

Welding courses are designed to prepare students to work in the welding industry - a high wage, highly skilled job in Michigan.
